

Research opportunities for Ukrainian researchers

WHO WE ARE?

Geološki zavod Slovenije (Geological Survey of Slovenia) is a public research institute with a 75-year history in the field of geosciences. Our mission is to provide information about the geological setting and natural resources of Slovenia and to participate in the development of knowledge about past and present processes in the Earth's crust. GeoZS collects, stores and disseminates data on the geology of Slovenia and, through international cooperation with its partners abroad, extends its activities beyond Slovenian borders. Our experts cover a wide range of research focused, and not limited to Regional geology, hydrogeology, geohazards, geothermal energy, mineral resources and , geochemistry.

WHAT WE OFFER?

Researchers and supporting staff interested in **spatial data management, information technology and programming, geological and hydrogeological modelling** can receive short-term funding (6 months) to continue their research and potentially integrate into the GeoZS research programme on a longer-term basis. Applications from researchers and supporting staff in other geoscience disciplines are also welcome.

We invite you to send **your CV with a short cover letter** to info@geo-zs.si.
