## PREFACE

Environmental engineering is a field of general engineering due to its complexity, wide applicability, and interdisciplinary nature. Environmental problems and challenges arise from various factors related to sustainable development. The international conference “Environmental Engineering” is devoted to the analysis of relevant environmental and water engineering issues, the dissemination of key research on roads and railways, the presentation of state-of-the-art geodesy and cadastre technologies, and the analysis, assessment, and optimization of research on energy supply and consumption systems.

The main objectives of the conference are:

- to promote direct discussions and versatile cooperation among researchers from Lithuanian and foreign research and higher education institutions, engineers, industry representatives, and municipalities;
- to bring together potential partners for successful, long-term, and continuous cooperation in the field of environmental engineering;
- to discuss the directions of applied research development and to encourage the implementation of advanced research results in practice.

The first international conference “Environmental Engineering” was held in 1994. At the 13<sup>th</sup> conference, researchers from 13 countries (Lithuania, Poland, Iraq, Ireland, Italy, Latvia, Malaysia, Peru, Portugal, Slovakia, Slovenia, Ukraine, and the Czech Republic) will present 115 papers, organized into four thematic sections: Environmental Protection and Water Engineering; Roads, Railways and Smart Cities; Geospatial Technologies and Innovations in Geodesy, Remote Sensing, and Environmental Monitoring; Energy for Buildings.

Prior to the conference, the International Scientific Committee selected 54 of the most significant and original papers, which have been published in the electronic conference proceedings. The Conference Organizing Committee sincerely thanks the members of the International Scientific Committee for their significant contribution to organizing the conference. We also express our gratitude to the conference participants and authors for their valuable insights and significant research results presented at the international conference “Environmental Engineering”.

Special thanks are extended to the conference sponsors for their contribution to the organization and implementation of the event. The Platinum Sponsor is “Bentley Systems International Limited”. Gold Sponsors: AB “Kauno tiltai”, UAB “Kerista”, UAB “Danfoss”, UAB “EMP Recycling”, UAB “ACO”. Silver Sponsors: UAB “Arginta”, UAB “Skadec”, UAB “GPS partneris”. Other Sponsors: UAB “Hnit-Baltic”, AB “Eurovia Lietuva”, VšĮ “RVA Agentūra”, UAB “GeoNovus”. Their support is essential in ensuring the high quality and smooth organization of the conference.
